

Rehabilitation Waiver

I authorize Return2Motion (R2M) to use the recommended rehabilitative and complementary treatments on my pet. I understand that R2M's recommendations and treatments of my pet constitute no guarantee of results. I further understand that R2M's recommendations and treatment are based, to some degree, on the information that I supply. In consideration of the foregoing, I waive and release any and all rights, claims, and causes of action I have or may have against R2M and its affiliates, officers, directors, employees, representatives, successors and assigns, that may arise as a result of any of R2M's recommendations or treatment of my pet, including, but not limited to any hydrotherapy, therapeutic exercise, or other treatments or care.

I agree that there are inherent risks to me associated with the use of R2M's facilities arising out of or associated with use and conditions such as wet floors, exercise mats, therapy equipment, and other pets. In consideration for R2M granting me permission to use their facilities, I agree to release R2M from liability arising out of or associated with such use, and hereafter waive any and all claims which may arise out of or be associated with such permissive use of the facilities. Rehabilitation and clinic equipment is to be used only by or under the supervision of the staff in caring for our patients. Do not attempt to use, climb, jump, or balance on any of the rehabilitation or clinic equipment you may encounter during your visit. Do not enter another treatment room, hydrotherapy room, rehabilitation therapy room, or other room in the center unless escorted by a staff member.

All pets must be restrained by a leash or placed in a kennel or carrier prior to entering R2M and must remain so while in our facility, unless being treated by a veterinarian or animal rehabilitation therapist. This is for your pet's safety and the safety of other pets and clients.

Pets must be clean, well-groomed (including trimmed nails) and parasite free, with no signs of fleas, ringworm, mange, or contagious diseases before coming to R2M for treatment. Please let us know if your pet has a history of heart disease or seizures. If your pet is in heat, showing signs of a urinary tract infection, or has incontinence (fecal or urinary) we will require that you bring waterproof diapers to use during their hydrotherapy session. R2M reserves the right to refuse pets based on these criteria.

Hydrotherapy sessions in the underwater treadmill are scheduled in 30-minute blocks. At the end of the treatment and within the 30-minute timeframe, your pet's rehabilitation therapist will rinse and towel dry your pet. At this time we do not have the staff or facilities to provide a full bath and/or blow dry. Appointments for late arrivals will be shortened to meet the scheduled completion time unless time is available to enable an extension. Appointments arriving more than 10 minutes late may need to be rescheduled to keep from interrupting the appointment times of other patients that are scheduled for treatment later in the day.

R2M therapists often take photographs and videos of patients while at the clinic for the purposes of education, promotion, or advertising.

Please select one of the following options:

- I authorize the use of my pet's image or likeness for these purposes.**
- I do not authorize the use of my pet's image or likeness for these purposes.**
